

Wrestling Meet Roster

Coach Submission Guide

What is this?

Your meet director uses a scheduling app to automatically create fair matchups for the meet. To do that, they need a roster of your wrestlers in a specific format. This guide walks you through filling out the roster template they sent you.

Step 1 — Open the template file

Your meet director sent you a file called **coach_roster_template.xlsx**. Open it in Excel or Google Sheets. You will see three blue example rows — delete those before you start entering your wrestlers.

Tip: The columns have dropdown menus for most fields — click a cell and a small arrow will appear on the right side. Use the dropdown instead of typing to avoid errors.

Step 2 — Fill in one row per wrestler

Here is what each column means:

Column	What to enter	Example
Wrestler Name	First and last name	Alex Johnson
Team	Your school or club name. Use the exact same spelling every time — it must match across all rosters.	Forest Lake
Grade	The wrestler's current grade in school. Enter a number only: 5, 6, 7, or 8.	7
Level	Experience level assigned by your meet director. Use one of these values: 0 = no experience 0.5 = very beginner 1.0 = first year 1.5 = developing 2.0 = experienced 2.5 = strong 3.0+ = advanced/elite If you are unsure, ask your meet director what level to assign.	1.0
Weight (lbs)	The wrestler's weight in pounds. Numbers only — do not include 'lbs' or any letters.	112
Early Match?	Does this wrestler need to leave early and must wrestle in the first half of the meet? Choose Yes or No from the dropdown.	No

Scratch?	Is this wrestler NOT competing tonight? Yes = absent or injured. No = they are wrestling. Most wrestlers will be No. You can also leave this blank and tell your meet director separately.	No
Gender	Choose Male or Female from the dropdown, or leave blank if not applicable.	Male
Cross Gender OK?	Can this wrestler compete against someone of a different gender? Yes = open to cross-gender matches. No = same gender only. Leave blank if Gender was left blank.	Yes

Step 3 — Save and send

Once you have entered all your wrestlers, save the file and email it back to your meet director as an attachment. Send it at least a day before the meet if possible so they have time to build the schedule.

If you are using Google Sheets: File → Download → Microsoft Excel (.xlsx) to save as the right format.

Common mistakes to avoid

Team name spelling: Make sure your team name is spelled exactly the same in every row. 'Forest Lake' and 'forest lake' will be treated as two different teams.

Weight format: Enter weight as a number only — 112 not '112 lbs'. Extra letters will cause an error.

Grade range: Only grades 5 through 8 are supported. Do not enter grade 9 or higher.

Level values: Use only the values your meet director specified. Do not make up your own level numbers.

Empty rows: Do not leave blank rows between wrestlers. Enter them one after another with no gaps.

Example rows: Delete the 3 blue example rows at the top before submitting.

Questions? Contact your meet director. Do not modify the column headers or add extra columns.
